Degree Pathway
A.S. in Liberal Arts and Sciences (Mathematics and Sciences) – Catalog Year 2020-21

Recommended Courses for Students Planning to Pursue a B.S. in Biology

The A.S. degree in Liberal Arts and Sciences (Mathematics and Sciences) is intended for students who plan to transfer to a 4-year college and university and pursue a bachelor’s degree in a field of science or mathematics. This degree plan is designed for students plan to pursue biology after transfer. Other degree plans are available for students who plan to pursue chemistry, computer science, mathematics, or physics. This Degree Pathway is also designed for students who place into MA-119. Additional Degree Pathways are available for students who place into other levels of mathematics. Please see the degree website or your advisor for more information.

Students interested in biology should also consider the new A.S. in Biology degree program.

Courses in **Bold Text** are prerequisites for later courses or only offered in the Fall or Spring semester and should be taken where indicated in the sequence.

**Fall Semester #1**

</tbody>
</table>

Notes:
1. Prerequisites for a course must be passed before taking the course. Corequisites must be passed before taking the course or taken in the same term as the course.
2. Students are required to take particular courses in some areas of the Common Core that fulfill both general education and major requirements. If students do not take the required courses in the Common Core, they will have to take additional credits to complete their degree requirements.
3. Students must complete one course from each of the Flexible Core categories (2A, 2B, 2C, 2D, and 2E) and one additional course from any one of the categories. SP-211 will satisfy area 2B. The course for area 2E and the one additional flexible core course must be selected from the courses in the list below marked with an asterisk (*).
4. Students must take 9-18 credits of major elective courses to reach 60 credits. See the list below for approved major elective courses. Students must complete two-course sequences in at least two different subject areas (biology, chemistry, computer science, mathematics, and physics).

All students must complete two (2) WI designated classes to fulfill degree requirements

Major Elective Courses
